Baptiste Dauphouy, fullstack developer

mail@bdau.fr   +504 8775 1076   www.bdau.fr   linkedin.com/in/baptiste-dauphouy

Experienced fullstack developer seeking a dedicated long-term remote role. I specialize in architecting clean and functional web applications using Typescript. Leveraging a strong background in freelancing, I am accustomed to working autonomously and solving problems efficiently from day one. I am trilingual (english, french, spanish) and highly adaptable to global workflows. My goal is to join an ambitious team where I can focus on engineering excellence and contributing to shared success.

Experience

November 2024 – January 2026

Software developer, Dotworld   Lausanne, Switzerland

Contributed to the development and modernization of two SaaS platforms (*makemycv.com, fileworld.co*).

- Led the migration of a PHP codebase to Next.js/Typescript, reducing technical debt and improving page load speeds
- Implemented new file processing features (lock, unlock PDF, audio to text).
- Built a builder for creating resumes, cover letters and resignation letters.
- Deployed a robust A/B testing infrastructure to drive data-led optimization.
- Integrated a centralized PSP management system.

Technologies used: Next.js, Typescript, Laravel, MongoDB

August 2022 – September 2024

Junior fullstack developer (internship), Radio France   Paris, France

Contributed to the evolution of a high-traffic media platform (*radiofrance.fr*) using SvelteKit and GraphQL.

- Improved accessibility of pages.
- Overhauled UI components to meet WCAG 2.1 accessibility standards.
- Implemented end-to-end and unit testing.

Technologies used: SvelteKit, Typescript, GraphQL

November 2021 – July 2023

Frontend developer, Synerg'hetic   Paris, France

Delivered the complete frontend architecture for two distinct web platforms using Next.js and Typescript (*vitaliplay.fr, atabulapp.com*).

- Developed the frontend of a digital health platform tailored to the over-55 demographic. Focused on accessible UI/UX design to ensure ease of use for a senior audience.
- Built an application connecting hotel and catering professionals with industry-specific offers, handling dynamic content via Directus.

Technologies used: Next.js, Typescript, TailwindCSS, Directus, Strapi

Education

October 2021 – September 2024

Bachelor Web developer (HETIC)   Paris, France

Design and development of digital solutions.

Skills

Web development (Typescript, React, Svelte, Node.js), mobile development (Flutter, React Native), SaaS development, blockchain, finance, e-commerce, Git, Linux, Vercel, Claude Code, Linear
